## Notes

- (a) The following definitions are used in this Budget Paper:
- ‘real’ means adjusted for the effect of inflation;
  - real growth in expenses and payments is calculated using the Consumer Price Index (CPI) as the deflator;
  - the Budget year refers to 2012-13, while the forward years refer to 2013-14, 2014-15 and 2015-16; and
  - one billion is equal to one thousand million.
- (b) Figures in tables and generally in the text have been rounded. Discrepancies in tables between totals and sums of components are due to rounding:
- estimates under \$100,000 are rounded to the nearest thousand;
  - estimates \$100,000 and over are generally rounded to the nearest tenth of a million;
  - estimates midway between rounding points are rounded up; and
  - the percentage changes in statistical tables are calculated using unrounded data.
- (c) For the budget balance, a negative sign indicates a deficit while no sign indicates a surplus.
- (d) The following notations are used:
- |         |   |
